Message of Economic Adviser

Modern age is the age of information and Information Technology has integrated the whole world. It is immensely important for statistical organizations to reap its benefits. ESO is the Nodal department for all the statistical activities of the State and serves as the data warehouse on all the socio economic aspects of the State. Since its inception, it has successfully catered to the statistical needs of the stakeholders. With a view to widen its outreach and to provide its users with quick and easy access to the statistics and reports generated by the organization, ESO has now launched its own website. The website will prove immensely useful to both national and international users interested in socio economic data related to Punjab. Due to advantage of the information technology, the vast datasets and voluminous reports generated by ESO will now be available at a click of the button on its website. This will not only help its existing users but will also encourage new users to join in and will ensure exhaustive utilization of data and reports. I invite all the stakeholders to visit the website for all their data needs related to Punjab economy and benefit from it.
