ANNUAL ADMINISTRATIVE REPORT 2018-19 ECONOMIC AND STATISTICAL ORGANIZATION, PUNJAB

BACKGROUND

After independence with the advent of the era of economic planning, the State Government created a Statistical office headed by the Economic and Statistical Adviser in 1949 to cater the statistical needs of the State. The Board of Economic Inquiry/Bureau of Economic and Statistics also became a part and parcel of this office in 1953 which was created in 1949/1950 in erstwhile PEPSU State. With the merger of Punjab and PEPSU in 1956, the present Economic & Statistical Organization (ESO) came into existence. Presently ESO is working as per guidelines of Central Statistical Office (CSO) of Government of India.

Preparation of annual State Income Estimates as per the methodology of CSO is the key function of this organization. In addition to it various important data sets are prepared on regular intervals which are widely used by large number of stakeholders such as planners, researchers, Government and Non Government Organizations.

Economic and Statistical Organization acts as the data bank and caters to the statistical needs of the State as well as Central Government, policy makers & research institutions, experts and scholars. The Organization collects primary as well as secondary data at the state, district, block and village level. The collected data is compiled, analyzed, interpreted and disseminated through various departmental publications. This Organization also acts as the nodal agency for statistical activities in the state. Therefore, it co-ordinates statistical activities within the State and keeps proper liaison with Central Statistical Office (CSO), Government of India.

“Statistical Abstract of Punjab” and “Economic Survey of Punjab” are two well known annual publications of this organisation which contain comprehensive data-based information on various socio-economic aspects of the State. Both of these publications are budget documents which are brought out annually and presented in budget session of the Vidhan Sabha. Village Directory is another online publication of the department which presents the Micro level data of all the villages of the state on 253 items.

2. ORGANIZATIONAL SETUP OF THE DEPARTMENT

Economic & Statistical Organization is headed by Economic Adviser who is assisted by Directors, Joint Directors, Deputy Economic and Statistical Advisers, Research Officers and Assistant Research Officers. The organizational set up of the department is at Annexure I.

Economic & Statistical Organization has 11 regular sections. Besides these, 5 more sections i.e. Member of Parliament Local Area Development Scheme (MPLADS), Twenty Point Programme (TPP), Economic Census, India Statistical Strengthening Project (ISSP) and Geospatial Information System (GIS) are working at the State Head Quarter. One section looks after the establishment matters and the remaining sections are engaged in data based & research oriented technical work, Plans and Programme Implementation. The establishment section manages the human resource administration. The Directors, Joint Directors and Deputy Economic and Statistical Advisers provide guidance in day to day research work on matters relating to economic and statistical issues. The Research Officers and Assistant Research

Officers are mainly responsible for analysis and interpretation of data whereas collection and compilation work is done by Statistical Assistants and Investigators.

At district level each District Statistical Office, is headed by Deputy Economic & Statistical Adviser. District Statistical Office plays dual role of collection of statistics and implementation of various development plans & programmes. District Statistical Offices are also engaged in sanction/release of funds under MPLAD scheme under which Rs. 5 crore are allocated annually to each MP of the State by Government of India. Work of Twenty Point Programme is also reviewed by this department.

These schemes (MPLADS & TPP) are being implemented with existing departmental sanctioned staff and no extra staff is available for these schemes and as a result the core Statistical work of department is seriously hampered. The details about Category-wise & Cadre-wise sanctioned and filled posts are at Annexure II and Annexure III respectively.

4. Organisational Swot Analysis

- **Strength:** Statistical Machinery is available upto Block level in the state which ensures the grass root level data collection on vital socio-economic indicators.
- **Weaknesses:** The slow pace of adaptability to use of latest IT technology and methodology and insufficient IT infrastructure to support it.
- **Opportunities:**
 - Regular guidance of CSO in various Statistical activities.
 - For various schemes 100% funds are provided by Government of India.
 - Interaction with Universities and academic institutions helps in improving data.
- **Threats: (i)** Acute shortage of manpower in general and qualitative particular. Dependence on outsourced and contractual staff. Timeliness and accuracy of data non-availability of experts as per changing needs i.e. IT and legal experts.

ii) To collect the timely and accurate data is the most important challenge as the data provider was not responsive and less important to data collection been given by line departments.

iii) Lack of statistical personnel in line departments to provide data on professional lines.

iv) Lack of skilled and IT experts.

a) Provide a summary of the outcomes from surveys, benchmarks for action, and other assessment metrics from your programmes and services.

ESO has got assessed the work done under MPLADS from third party. Agricultural Finance Corporation has conducted it in 4 phases, 4 districts in each phase. It has submitted reports for 4 phases comprising 16 districts and 5th phase comprising 6 districts is under progress. It has made recommendations for improvements in the implementation of MPLADS which had been circulated to all the Deputy Commissioner for compliance. It has led to improvements in the scheme and district authorities are more vigilant while sanctioning funds and conscious of possible audit objections and irregularities.

b) Describe how data driven decision making and policy formulation has been used to improve processes and programmes in your organisation.

Third party inspection reports on MPLADS already circulated to DCs have led to improvements in the implementation of schemes.
